

Benefits of using

Low cost design service.

Quick turn around.

Lower assembly cost.

Increased efficiency.

Reduce development time.

Outsourcing saves overhead.

Increase your sales.

Services offered:

Multilayer PCB layout.

Schematic capture.

Prototype development.

Full documentation.

Thru hole (TH), surface mount (SMT), and mixed designs.

Parts procurement.

Assembly, prototype and Beta units.

With twenty years spent in the business, 100 WEST ELECTRONICS has the knowledge to meet your requirements. We have had experience with diverse systems, ranging from smaller SMT boards to larger power control designs.

Some of our past designs include:

Battery power systems.

Solid state LED lighting.

DC/DC converters.

Thermal design.

AC/DC power supplies.

A/D & D/A converters.

AC power control, 1 & 3 phase.

CE requirements.

Test fixtures and procedures.
